課題別研修「先進国市場を対象にした輸出振興／マーケティング戦略 (A)」
JFY 2017

NO. J1704350 / ID. 1784648

Course Period in Japan: From June 4th, 2017 to July 8th, 2017

This information pertains to one of the JICA Knowledge Co-Creation Program (Group & Region Focus) of the Japan International Cooperation Agency (JICA), which shall be implemented as part of the Official Development Assistance of the Government of Japan based on bilateral agreement between both Governments.

‘JICA Knowledge Co-Creation (KCC) Program’ as a New Start

In the Development Cooperation Charter which was released from the Japanese Cabinet in February 2015, it is clearly pointed out that *“In its development cooperation, Japan has maintained the spirit of jointly creating things that suit partner countries while respecting ownership, intentions and intrinsic characteristics of the country concerned based on a field-oriented approach through dialogue and collaboration. It has also maintained the approach of building reciprocal relationships with developing countries in which both sides learn from each other and grow and develop together.”* We believe that this ‘Knowledge Co-Creation Program’ will serve as a center of mutual learning process.

I. Concept

Background

Today, the export promotion plays a major role in economic development of many developing countries. However, most of the exports from developing countries are raw materials rather than processed products and the improvement of export promotion remains as challenge as it is not linked to development of domestic industry. In this course for export promotion, it will mainly focus on the market development.

In order to promote an export, the local company must be able to understand and assess the needs in the international market. Then, based on the analysis, it must select the potential market; properly develop a product (in both design and pricing); and effectively promote the product. As for the role of the Investment Promotion Agency (IPA), it must be able of providing adequate market information, arrange and advice on a promotional activities, as well as organizational reform of itself if necessary.

This program aims to (1) ensure the capacity development of stakeholders of respective countries, by providing them with opportunity to learn the export promotion strategy and marketing strategy, and (2) practically apply the knowledge learned in Japanese market, and implement the developed action plan through the Public-Private Partnership.

For what?

This program aims to provide participants with opportunity to acquire skills on market-oriented export promotion of locally made unique products. Participant will learn practical knowledge of marketing and export promotion, including understanding of customers in developed countries, effective product development, branding, effective design, and usage of promotional tools.

For whom?

This program is offered to (1) officials who are engaged in export promotion at governmental organizations or regional institutions and (2) managers of private sector institutions or associations, such as cooperatives, CCIs (Chamber of Commerce and Industries) or industry groups which are willing to promote export of their products.

How?

Participants will have opportunities to acquire practical approaches and methods of marketing and export promotion fit to their products being sold in the developed market, by taking Japanese market as an example. Participants are expected to learn the essence of successful promotion, branding and promotion by case studies, lectures and workshops. This program will require participants' active participation in the group discussions and workshops as well as providing assignments before arrival in Japan.

For Your Reference

JICA and Capacity Development

The key concept underpinning JICA operations since its establishment in 1974 has been the conviction that “capacity development” is central to the socioeconomic development of any country, regardless of the specific operational scheme one may be undertaking, i.e. expert assignments, development projects, development study projects, Knowledge Co-Creation programs (until 2015, so called “training”), JOCV programs, etc.

Within this wide range of programs, Knowledge Co-Creation Programs have long occupied an important place in JICA operations. Conducted in Japan, they provide partner countries with opportunities to acquire practical knowledge accumulated in Japanese society. Participants dispatched by partner countries might find useful knowledge and re-create their own knowledge for enhancement of their own capacity or that of the organization and society to which they belong.

About 460 pre-organized programs cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs are being customized to address the specific needs of different target organizations, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

Japanese Development Experience

Japan was the first non-Western country to successfully modernize its society and industrialize its economy. At the core of this process, which started more than 140 years ago, was the “*adopt and adapt*” concept by which a wide range of appropriate skills and knowledge have been imported from developed countries; these skills and knowledge have been adapted and/or improved using local skills, knowledge and initiatives. They finally became internalized in Japanese society to suit its local needs and conditions.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from this “*adoption and adaptation*” process, which, of course, has been accompanied by countless failures and errors behind the success stories. We presume that such experiences, both successful and unsuccessful, will be useful to our partners who are trying to address the challenges currently faced by developing countries.

However, it is rather challenging to share with our partners this whole body of Japan’s developmental experience. This difficulty has to do, in part, with the challenge of explaining a body of “tacit knowledge,” a type of knowledge that cannot fully be expressed in words or numbers. Adding to this difficulty are the social and cultural systems of Japan that vastly differ from those of other Western industrialized countries, and hence still remain unfamiliar to many partner countries. Simply stated, coming to Japan might be one way of overcoming such a cultural gap.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.
