P R E D G O V O R

Publikacija "Žene i muškarci u Crnoj Gori" daje kratak prikaz stanja žena i muškaraca u našem društvu. Nastala je kao odgovor na sve veće potrebe korisnika/ca da se stanje u društvu, između ostalog, prati i preko statističkih podataka prikazanih prema polu.

Publikacija se sastoji od tabela i grafikona bez dodatnih statističkih i socioloških analiza i može poslužiti kao izvor informacija svim korisnicima podataka koji su zainteresovani za položaj žena i muškaraca i za jednakost polova u Crnoj Gori.

Rodna ravnopravnost znači da su žene i muškarci jednako prisutni u svim područjima javnog i privatnog života, imaju jednak status, jednake mogućnosti za ostvarivanje svojih prava i jednaku korist od ostvarenih rezultata.

Podaci koji su prikazani u ovoj publikaciji odnose se na sljedeće oblasti:

- Stanovništvo
- Zdravlje
- Obrazovanje
- Socijalna zaštita
- Pravosuđe
- Zaposlenost i zarade
- Politika

Osim apsolutnih podataka prikazanih po polu data je i polna raspodjela u procentima kojom se prati položaj žena i muškaraca.

Većina podataka prikazanih u ovoj publikaciji rezultati su istraživanja koja sprovodi Zavod za statistiku. Manji dio podataka preuzet je od drugih državnih institucija čija su imena navedena ispod tablica.

Zahvaljujemo se Odeljenju za rodnu ravnopravnost Ministarstva za ljudska i manjinska prava na pomoći pri izradi ove publikacije.

Direktor, Radomir Đurović

P R E F A C E

The publication "Women and men in Montenegro" gives short insight into the status of women and men in our society. It appeared as the response to numerous needs of users to also monitor the society by gender segregated data.

The publication contains tables and graphs without written analysis of data and may serve as the source of information to all data users interested in the position of women and men, as well as for the gender equality in Montenegro.

Gender equality means that women and men are equally represented in all areas of public and private life, have equal status, equal opportunities to exercise their rights and equal benefit of the achieved results.

Data presented in this this publication refer to the following topics:

- Population
- Health
- Education
- Social welfare
- Justice
- Employment and wages
- Politics

In addition to the absolute data presented by sex, it contains gender distribution in percentage, which monitors the position of women and men.

Most of the data presented in this publication is the result of research implemented by Montenegrin Statistical Office. A smaller portion of data is downloaded from other government institutions whose names are listed below the tables.

We would like to thank Department for Gender Equality of the Ministry of Human and Minority Rights for assisting in preparation of the publication.

Director, Radomir Đurović

STANOVNIŠTVO

Podaci o broju stanovnika prikupljeni su u popisima sprovedenim od 1921. - 2003. godine. Pri korišćenju popisnih rezultata, treba voditi računa o tome da ne postoji potpuna uporedivost definicija stalnog, odnosno ukupnog stanovništva u popisu 2003. i ranijim popisima. Naime, u popisima 1971 - 1991. godine, pored stanovništva u zemlji, u stalno stanovništvo su ubrajani i crnogorski građani i građanke na privremenom radu u inostranstvu, kao i članovi koji su s njima boravili u inostranstvu. U skladu s međunarodnim preporukama, u popisu 2003. godine, osim stanovništva u zemlji, u sastav stalnog stanovništva ulaze crnogorski/e građani/ke čiji je rad, odnosno boravak u inostranstvu kraći od godinu dana, kao i strani/e državljani/ke koji u našoj Republici rade ili borave u svojstvu članova porodice duže od godinu dana.

Stanovništvo prema polu i starosti predstavlja broj lica određenog pola, grupisanih po starosti, prema navršenim godinama života. U tabeli je prikazana starosno - polna struktura preko apsolutnih frekvencija i / ili preko procentualne distribucije.

Godišnje procjene broja stanovnika se računaju na osnovu popisnih rezultata i redovnih statističkih istraživanja o umrlima, rođenjima i unutrašnjim migracijama stanovništva.

Podaci o bračnom stanju prikazani su za stanovništvo staro 15 i više godina, i odnose se na formalno-pravni status lica (zakonsko bračno stanje), a ne na faktičko stanje u okviru porodičnih zajednica.

Podaci o nacionalnoj ili etničkoj pripadnosti rezultat su slobodnog izjašnjavanja stanovnika/ca, odnosno roditelja, usvojlaca/teljki ili staratelja/ki kada su u pitanju djeca mlađa od 15 godina.

Podaci o migracijama odnose se na unutrašnje migracije (kretanje stanovništva unutar Crne Gore). U tabelama je data starosno- polna struktura migrantskog stanovništva, kao i njihovo kretanje unutar Crne Gore po opštinama.

POPULATION

Data on the number of inhabitants are collected in censuses conducted from 1921 to 2003. When using the census results, one should take into account that there is no complete comparison of the definition of permanent or total population in Population Census 2003 with earlier censuses. Namely, the censuses of 1971 - 1991 in addition to the population in the country included in a permanent population also Montenegrin citizens temporarily working abroad, as well as members who are staying with them abroad. In accordance with international recommendations, the Population Census 2003, apart of the population in the country, included Montenegrin citizens who are working, or staying abroad less than one year, as well as foreign citizens in our country who are working or staying as a family members for more than a year.

Population by sex and age is the number of persons of particular sex, grouped by age, according to years of life. The table shows the age - sex structure over the absolute frequency and /or a percentage distribution.

Annual population estimations are calculated based on the Census results and regular statistical surveys of deaths, births and internal population migration.

Data on marital status are shown for people aged 15 and above, and refer to the formal-legal status of persons (legal marital status), and not to the actual situation within the family units.

Data on national or ethnic affiliation are the result of free expression of citizens, or parents, adoptive parents or guardians when it comes to children aged under 15.

Data on migration are related to internal migration (population movement within Montenegro). In the tables below is given age-sex structure of migrated population, as well as their movement within the municipalities of Montenegro.

Z D R A V L J E

Statistika rođenih obuhvata svu djecu rođenu u posmatranoj godini (živorođenu i mrtvorođenu). Živorodeni djetetom smatra se dijete koje je, po rođenju, pokazivalo znake života (disanje i kucanje srca) makar i za najkraće vrijeme, bez obzira na trajanje trudnoće majke. Mrtvorođeni smatra se ono dijete koje je rođeno bez ikakvih znakova života, pod uslovom da je nošeno duže od 28 nedjelja.

Statistika umiranja (mortaliteta) obuhvata svaki slučaj smrti. Šifriranje i agregiranje podataka o osnovnom uzroku smrti vrši se prema Međunarodnoj klasifikaciji bolesti, X revizija (MKB - 10).

Umrli prema vodećim uzrocima smrti predstavlja broj umrlih lica čiji je uzrok smrti najfrekvenciji.

Specifična stopa fertiliteta za žene uzrasta 15 - 19 godina predstavlja odnos broja djece čije su majke navedene starosti na 1000 žena te starosti u ukupnoj populaciji.

Stope ukupnog fertiliteta, tj. ukupan broj živorođene djece na jednu ženu, odnosno zbir odgovarajućih specifičnih stopa fertiliteta, računate su za starosni interval od 15 do 49 godina.

Stopa smrtnosti odojčadi definiše se kao broj umrle odojčadi na 1000 živorođenih u godini posmatranja.

HEALTH

Statistics of born children includes all children born in the observed year (both liveborn and stillborn). Liveborn baby is the one who, at birth, showed signs of life (breathing and heartbeat) even for a short time, regardless of the duration of the pregnancy. A stillborn baby is the one who was born without any signs of life, under condition that pregnancy was longer than 28 weeks.

Statistics of death (mortality) include all cases of death. Aggregation and coding of data on the primary cause of death is carried out according to the International Classification of Diseases, X revision (ICD - 10).

Deaths by main causes of death represent the number of death persons whose cause is the most frequent one.

The specific fertility rate for women aged between 15-19 years is the ratio of children whose mothers are of the mentioned age per 1,000 women in this age of total population.

Total fertility rate, i.e. number of born children on one women, or the total number of specific fertility rates, have been calculated for age interval from 15 to 49 years of age.

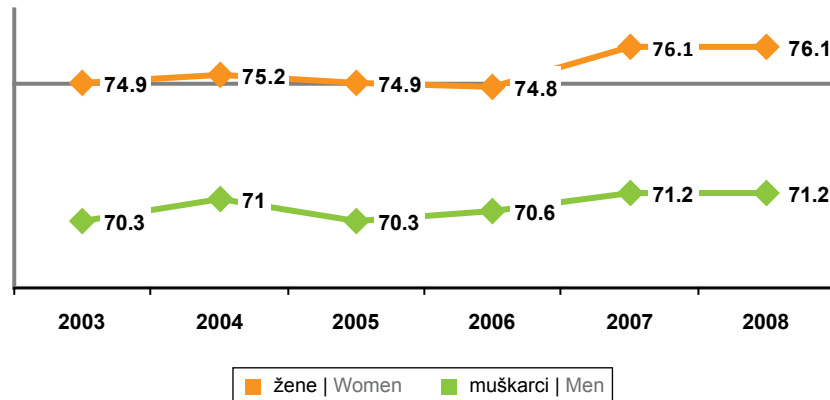

Mortality rate of born children is defined as the number of dead children on 1000 newly born in the examination year.

OBRAZOVANJE

Djeca u predškolskim ustanovama, koja su dnevno zbrinuta, imaju obezbijeđenu njegu, ishranu i vaspitanje do polaska u školu.

Pod pojmom škole podrazumijeva se obrazovno - vaspitna ustanova ili jedinica koja obavlja obrazovno - vaspitnu djelatnost ostvarivanjem nastavnog plana i programa.

Učenici/ce prvog razreda redovnih osnovnih škola su djeca stara 6 godina i više i upisana u prvi razred osnovne škole.

Učenici/ce prvog razreda redovnih srednjih škola su djeca stara 14 godina i više koja upisuju gimnaziju, srednje stručne ili umjetničke škole u trajanju od tri ili četiri godine.

U trogodišnjim školama stiže se treći, a u četvorogodišnjim četvrti stepen stručne spreme.

Status studenta/kinje stiže se upisom u visokoškolsku ustanovu. Lica koja imaju odgovarajuće srednje obrazovanje imaju pravo upisa na prvu godinu studija.

Nastavno osoblje osnovnih i srednjih škola predstavlja stručni nastavnički kadar koji, primjenjujući nastavni plan i program u obrazovno - vaspitnim ustanovama, učestvuje u pripremi, organizaciji i izvođenju nastave.

Nastavno osoblje visokoškolskih ustanova obuhvata lica koja neposredno realizuju studijski program i imaju naučna zvanja: redovni/a profesor/ica, vanredni/a profesor/ica, docent/ica, profesor/ica visoke stručne, predavač/ica visoke stručne škole, naučni/a savjetnik/ca, viši/a naučni/a saradnik/ca, naučni/a saradnik/ca, asistenti/kinje ili predavači/ice u zvanju saradnik/ca u nastavi i saradnik/ca za istraživanja. U realizaciji nastave ovom akademskom osoblju pomaže i stručno osoblje u zvanjima: viši/a lektor/ka, lektor/ka, viši/a stručni/a saradnik/ca i laborant/ica.

Diplomirani/a student/kinja je lice koje dobija diplomu o završenoj višoj školi, visokoj školi, fakultetu ili akademiji umjetnosti.

Magistar/rica nauka je lice koje je odbranilo magistarsku tezu, koja je rezultat samostalnog naučnog rada studenta/kinje koji sistematizuje postojeća naučna znanja i daje doprinos novim naučnim saznanjima.

Doktor/ka nauka je lice koje je već steklo naziv magistra/ice nauka, a koje je odbranom doktor-ske disertacije steklo i naučno zvanje doktora/ke nauka.

EDUCATION

Children in preschool education, which are looked after day, have provided care, nutrition and education until the beginning of school.

The term school refers to an educational institution or unit that performs educational activities following the curriculum.

Pupils of the first class of primary schools are children aged 6 and above enrolled in the first class of the primary school.

Pupils of the first class of secondary schools are children aged 14 who enrol in grammar schools, secondary vocational training schools or art schools that last 3 or 4 years.

Student status is acquired by enrolling in an institution. Persons who finished a corresponding secondary school have right to enroll in the first year of studies.

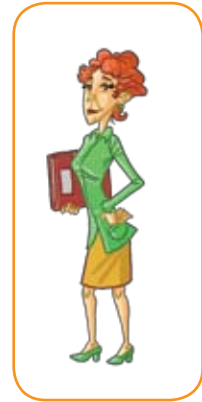

Teachers of primary and secondary schools represent the educational staff who takes part in the preparation, organization and holding of lessons, following the curriculum.

Teachers of post secondary schools and faculties include persons who directly realize the curriculum and have scientific titles: regular professors, associate professors, docents, lecturers, lecturers at secondary and post-secondary schools, scientific advisor, senior scientific advisor, scientific associate, assistants and lecturers in teaching and associates for researches, The academic staff is assisted by competent persons titled as senior lecturer, lecturer, senior competent associate and laboratory technician.

Graduate student is a person who receives the degree after finished post-secondary school, university or art academy.

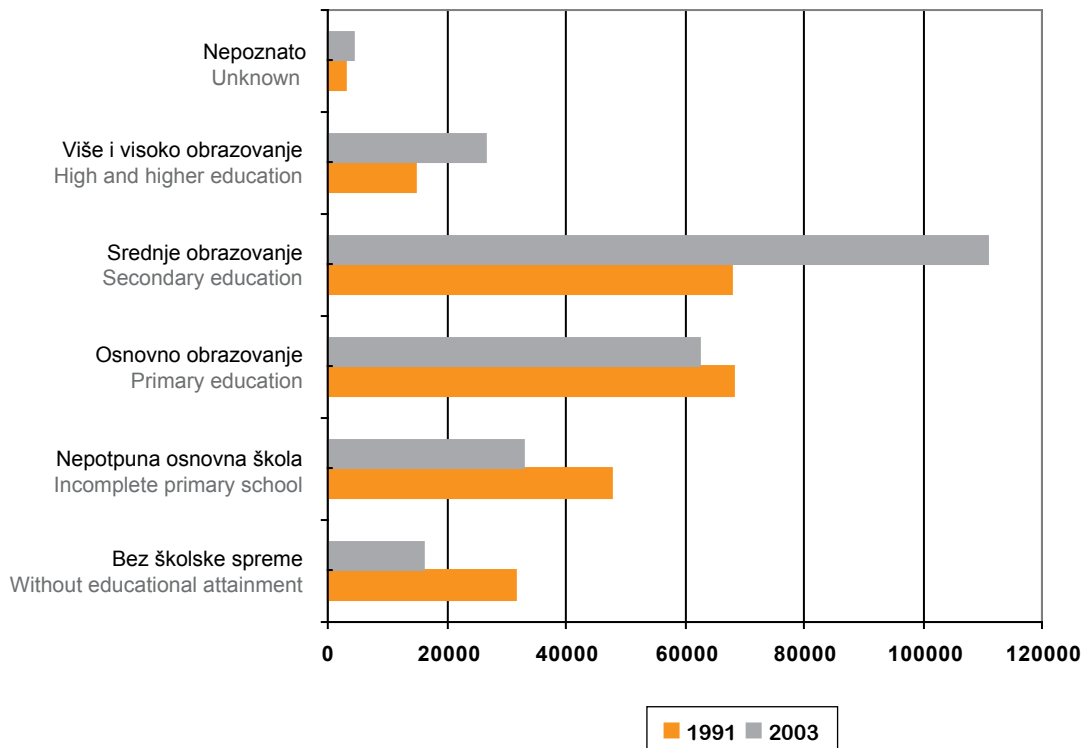

Master of Science is a person who defended his/her Master thesis which was the result of his/her independent scientific work. The student thus classified and extended the existing scientific knowledge.

Doctor of Science is a person who has earned a Master degree, and after defending the doctorate thesis, he/ she earned a PhD.

SOCIJALNA ZAŠTITA

Učenički dom je ustanova koja pruža smještaj, ishranu i vaspitanje učenicima/cama osnovnih i srednjih škola, koji se školuju van mjesta prebivališta.

Studentski dom obezbjeđuje smještaj i ishranu studentima/kinjama visokoškolskih ustanova za vrijeme studija.

Korisnikom/com socijalne zaštite smatra se svako lice koje je u toku izvještajne godine, jednom ili više puta koristilo određene oblike i mjere socijalne zaštite i usluge socijalne službe. Korisnici/ce socijalne zaštite razvrstavaju se na maloljetne i punoljetne korisnike/ce.

Ustanove za djecu i omladinu (ustanove za djecu i omladinu lišenu roditeljskog staranja, ustanove za djecu i omladinu ometenu u psihičkom i fizičkom razvoju, ustanove za djecu i omladinu sa poremećajima u ponašanju) obezbjeđuju privremeno ili trajno zbrinjavanje, ishranu, zdravstvenu zaštitu, vaspitanje, obrazovanje i stručno osposobljavanje djece i omladine kojima je potreban ovakav oblik zaštite.

SOCIAL WELFARE

Student Hostel is an institution which provides accommodation, food and education of students in elementary and secondary schools, who are studying outside their residence.

Student Hostels provide food and accommodation for students of higher education institutions during the studies.

Social welfare beneficiary is a person who used certain forms and measures of social welfare and social welfare services once or several times during the reporting year. The users of social protection are divided into minors and adults.

Institution for children and youth (institutions for children and youth deprived of parental care, institutions for physically handicapped children and youth and institutions for neglected children and youth) provide accommodation, food, health protection, education and competent training for children and youth who need such form of protection.

P R A V O S U D E

Osuđena lica jesu lica koja su proglašena krivima i kojima su sudovi opšte nadležnosti konstatovali pravosnažnost presude u odgovarajućoj godini.

Pravosnažno osuđeno maloljetno lice jeste osoba koja ima od 14 do 18 godina starosti i koja je zbog učinjenog djela pravosnažno osuđena na osnovu krivičnog zakona od strane suda opšte nadležnosti.

Pravosnažno osuđeno punoljetno lice jeste osoba koja ima preko 18 godina starosti i koja je zbog učinjenog djela pravosnažno osuđena na osnovu krivičnog zakona od strane suda opšte nadležnosti.

JUSTICE

Convicted persons are those found guilty and sentenced by the courts of general jurisdiction in the corresponding year.

A validly convicted minor is a person aged between 14 and 18 convicted of a crime by a court of general jurisdiction in accordance with the criminal code.

A validly convicted adult is a person aged over 18, convicted of a crime by a court of general jurisdiction in accordance with the criminal code.

ZAPOSLENOST I ZARADE

Aktivno stanovništvo čine lica stara 15 i više godina koja obavljaju zanimanje, kao i nezaposlena lica koja traže posao i lica koja su privremeno prekinula obavljanje zanimanja zbog služenja vojnog roka (aktivna lica koja ne obavljaju zanimanje).

Neaktivno stanovništvo čine sva lica stara 15 i više godina koja nisu svrstana u aktivno stanovništvo.

Aktivno stanovništvo koje obavlja zanimanje čine lica stara 15 i više godina koja obavljaju određenu vrstu poslova u cilju sticanja sredstava za život.

Djelatnost se odnosi na ekonomsku aktivnost preduzeća, radnje, ustanove, zadruga, itd., u kojoj lice radi.

Podaci o prosječnim zaradama prikazuju prosječne zarade isplaćene u godini. Pod pojmom prosječna zarada zaposlenog lica podrazumijeva se: Zarada zaposlenog ostvarena za obavljeni rad i vrijeme provedeno na radu, uvećane zarade, naknade zarada i druga primanja.

Stopa aktivnosti predstavlja procenat aktivnog stanovništva u ukupnom stanovništvu starom 15 i više godina.

Stopa zaposlenosti predstavlja procenat zaposlenih u ukupnom stanovništvu starom 15 i više godina.

Stopa nezaposlenosti predstavlja procenat nezaposlenih u ukupnom broju aktivnih stanovnika.

Stopa neaktivnosti predstavlja procenat neaktivnog stanovništva u ukupnom stanovništvu starom 15 i više godina.

Prosječna zarada izračunava se tako što se ukupno isplaćena masa zarada u mjesecu dijeli sa brojem zaposlenih na koje se odnose izvršene isplate.

Objašnjenje znakova

- nije nula ali je izuzetno neprecizna procjena ($CV \geq 30$)
- (()) neprecizna procjena ($20 \leq CV < 30$)
- { } manje precizna procjena ($10 \leq CV < 20$)
- CV Standardna greška procjene kao procenat procjene.

EMPLOYMENT AND WAGES

Active population comprises persons aged 15 and above who perform an occupation, as well as unemployed persons looking for employment and persons which temporarily stopped to perform an occupation, due to military service (active persons not performing occupation).

Non-active population comprises all persons aged 15 and above which are not classified as active population.

Active population doing activity comprises persons aged 15 and above who perform a job as means of living.

The term activity refers to the economic activity of an enterprise, shop, institution, cooperative etc. a person works for.

Data on average earnings show earnings paid out in a year. Average employed person earnings comprise earnings realized by an employed person during regular working hours, raised earnings and other incomes.

Activity rate is the percentage of active population in the total population aged 15 and above.

Employment rate is the percentage of employees in the total population aged 15 and above.

Unemployment rate is the percentage of unemployed in the total population aged 15 and above.

Inactivity rate is the percentage of non-active population in the total population aged 15 and above.

The average salary is calculated by the total mass of salary paid in the month divided by the number of employees referred to payments made.

Legend

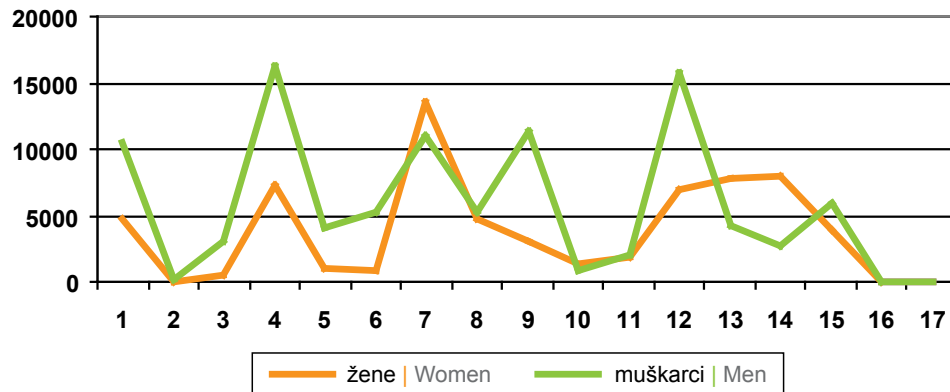

- . not zero but is very imprecise estimate ($CV \geq 30$)
- (()) imprecise estimate ($20 \leq CV < 30$)
- { } less precise estimate ($10 \leq CV < 20$)
- CV standard error of estimate as a percentage of assessments
